

**RJ45 to RJ45 Category 6 Ethernet Cables**

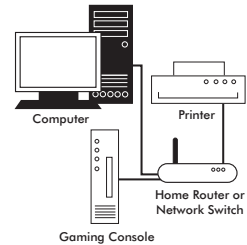

- Reliably and conveniently network your cable or DSL modem, home router, PCs, Macs and networked devices.
- Provides performance up to 250 MHz and is suitable for 10BASE-T/100BASE-TX and 1000BASE-T/1000BASE-TX (Gigabit Ethernet). The Cat6 STP cable is also expected to suit the 10GBASE-T (10 Gigabit Ethernet) standard, virtually eliminating the need for future rewiring.
- Features more stringent specification than Cat5/Cat5e cables in attenuation, near-end cross talk (NEXT), and power sum NEXT that helps reduce noise caused by crosstalk and system interference.
- Reduces electromagnetic interference (EMI) with shielding for twisted pair wires.

**Features**

- 50-micron, 24k gold-plated connectors resist corrosion and ensure superior signal transfer and maximum performance
- Impedance-matched, twisted-pair wires reduce signal degradation and cross-talk for high-speed, error-free data transmission
- Molded integral strain relief with built-in snagless connector enhances cable durability and simplifies installation
- Stranded high-purity copper wires provide installation flexibility
- Limited Lifetime Warranty\*

- Network your PCs together to share files and your broadband internet connection
- Fully compatible with all 10Base-T, 100Base-T and 1000Base-T Ethernet networks
- Tested to the 250 MHz specification of the TIA/EIA-568B Category 6 Telecommunications cabling standard

**Package Contents**

- CAT6 Shielded Twisted Pair (STP) Cable (CT6B1, CT6B2 or CT6B6)
- Lengths:
  - CT6B1 - 1.0 m (3.3 ft)
  - CT6B2 - 2.0 m (6.6 ft)
  - CT6B6 - 6.0 m (20 ft)

**Specifications**

- Snagless connector
- Most recommended for Gigabit Ethernet local area networks (LANs)

**Warranty**

- Limited Lifetime Warranty\*
