Quick Start

NETGEAR LTE Modem 2120
LB2120-100AUS, LB2120-100EUS, LB2120-100NAS

Install Your LTE Modem

1. Install the micro SIM card.
   Note: To obtain an activated micro SIM (3FF format) card, contact your mobile broadband service provider. If you use a nano SIM (4FF format) card, you must use an adapter.
   a. Ensure that power to the modem is off.
   b. Remove the SIM card cover from the bottom of the modem.
   c. Unlock the SIM card door.
   d. Carefully slide the micro SIM card into the slot.
   e. Lock the SIM card door, and close the SIM card cover.

2. Connect the modem to a wireline broadband modem.
   a. Connect one end of the Ethernet cable that came in the package to the blue WAN Gigabit Ethernet port on the modem.
   b. Connect the other end of the Ethernet cable to a wireline broadband modem, such as a DSL, cable, or fiber optics modem, that provides an Internet connection.

Provide power to the modem.
   a. Connect the power adapter to the modem and plug it into an electrical outlet.
   b. Press the power On/Off button on the modem.
   c. Wait for the Power LED to light green, which might take several minutes.

4. Connect the modem to a router or directly to a computer.
   a. Connect one end of an Ethernet cable (not provided) to the yellow Gigabit Ethernet LAN port on the modem.
   b. Connect the other end of the Ethernet cable to an Ethernet port on your computer.

The modem is ready for operation.

Manage Your LTE Modem

➢ To access your LTE modem:
   1. Launch a web browser from a device that is connected to the modem.
   2. In the address field of the web browser, enter http://192.168.5.1.
   3. In the Sign In field, enter the default password, and click the Sign In button. See the modem label for the default password.

While the password that you enter is unique to your modem and is secure, we recommend that you change it to a password that you want to use.
By default, when the modem powers up with a SIM card installed, it automatically searches for and connects to your mobile service provider’s mobile broadband network. This process might take several minutes. The SIM card that is installed determines the mobile broadband network to which the modem connects.

However, if the modem does not automatically connect to the mobile broadband network, the Power LED remains solid amber, and you must contact your mobile service provider to get the access point name (APN) profile information and add and activate a custom APN profile in the modem (see Add and Activate a Custom APN Profile).

**Status LEDs**

For more information about the LEDs, see the user manual.

**Add and Activate a Custom APN Profile**

If the modem does not recognize the settings of the installed SIM, contact your mobile service provider to get information about the APN profile that you must use. Use the information that your mobile service provider gives you to configure a custom APN profile.

1. Launch a web browser from a device that is connected to the modem.
2. In the address field of the web browser, enter `http://192.168.5.1`.
   - The limited Dashboard page displays.
3. To access the full Dashboard page and other pages, in the **Sign In** field, enter the default password, and click the **Sign In** button.
   - See the modem label for the default password.
4. Select **Settings > Network > APN**.
   - The APN page displays.
5. Click the **Add** button.
   - The New APN pop-up window opens.
6. Enter the settings for the new APN profile.
   - Use the information that your mobile service provider gave you. If your mobile service provider did not specify some settings, leave the default settings.
7. Click the **Save** button.
   - The new APN profile displays on the page but is not yet the active profile.
8. Select the radio button next to the APN profile that you just added.
   - The modem now uses the selected APN profile to establish a connection with the mobile broadband network of the mobile service provider.
9. If you still cannot get an Internet connection, contact your mobile service provider to verify the information for the APN profile.

Thank you for purchasing this NETGEAR product. You can visit [www.netgear.com/support](http://www.netgear.com/support) to register your product, get help, access the latest downloads and user manuals, and join our community. We recommend that you use only official NETGEAR support resources.
