

Three high-speed ports

keep your office at peak performance

10/100 Mbps Print Server

PS113

NETGEAR's renowned technology has produced a print server that outdoes others on the market. The PS113 connects three parallel printers to your network, and unlike most print servers, delivers information to all three at the same top speed. For example, connect a laser printer, a color printer and a large-format printer, and everyone on your network can use them.

You can set up your printers any place that's convenient to all users—close at hand or out of the way. And you'll save money because the high-performance PS113 is competitively priced to help you increase the productivity of your small office or home office, without clobbering your budget.

UNCOMPLICATED

Installation is easy with Windows-based FirstGear™ installation software.

ADAPTABLE

Supports most parallel port printers, including Canon, Epson, HP and Xerox.

FLEXIBLE

Server connection is 10/100 Mbps—either speed can be run on your network.

INTUITIVE

No network speed configuration required—it's sensed automatically.

UP FRONT

Comprehensive LED indication gives you detailed feedback on ports and network activity.

DURABLE

Count on a lasting relationship with the PS113—it's built with a sturdy metal frame, and comes with a 5-year warranty.
