Sync your Orbi satellite with the NETGEAR Orbi app

You can use the NETGEAR Orbi app to sync your Orbi satellite with your Orbi router.

Note: If you don't own a mobile device, or you want to connect your new Orbi satellite with an existing Orbi satellite, follow the instructions in [Manually sync your Orbi satellite with the Sync button](#).

1. Download the NETGEAR Orbi app on your mobile device.
For more information about the app,

visit Orbi-app.com.

2. Launch the NETGEAR Orbi app.
3. Tap  > **ADD SATELLITE**.
4. Follow the prompts to sync your satellite.

For more information about the satellite's ring LED sync colors, see [Satellite sync LED colors](#).

Manually sync your Orbi satellite with the Sync button

You can manually sync your Orbi satellite with your Orbi router.

If you own an existing Orbi satellite, you can also sync your new Orbi satellite with your existing satellite.

1. Place and power on your new Orbi satellite.

The satellite's ring LED pulses white.

For more information about where to place your satellite, see the user manual.

2. Wait for the satellite's ring LED to light solid white.
3. Press the **Sync** button on the back of your new Orbi satellite.
4. Within two minutes, press the **Sync** button on the back of your Orbi router or existing satellite.

For more information, see [Satellite sync LED colors](#).

Satellite sync LED colors

The satellite's ring LED lights white while the satellite attempts to sync with the router. Then the ring LED lights one of the following colors for about three minutes and then turns off:

- **Blue.** The router and satellite successfully synced, and the connection between the router and satellite is good.
- **Amber.** The router and satellite successfully synced, and the connection between the router and satellite is fair. Consider moving the satellite closer to the router.
- **Magenta.** The router and satellite failed to sync. Move the satellite closer to the router and try again.
