### Package Contents:

- **Resource CD**
- **Wireless-N Gigabit Router**
- **Ethernet Cable**
- **Power Adapter**

### Installation Guide

#### Step 1: Connect your modem.
- CAUTION: MAKE SURE YOUR MODEM IS TURNED OFF OR UNPLUGGED BEFORE STARTING THE INSTALLATION.
- Connect your modem.

#### Step 2: Connect your router.
- Connect your router.

#### Step 3: Connect your computer.
- Connect your computer.

#### Step 4: Power on your modem.
- Wait until your modem cycles on (approximately 2 minutes).
- Note: If you have a battery-backed modem, press the reset button. (In some cases, you may need to remove, then re-insert, the battery to recycle your modem.)

#### Step 5: Power on your router.
- Wait until the power LED turns solid green.

#### Step 6: Insert your CD.
- Click Router Setup and follow the steps to set up a secure wireless network.
- Note: If your laptop does not have a CD drive, see “No CD Drive” Installation on the back to complete your router setup.
“No CD Drive” Installation

Set up Internet access
1. In the address field of your browser, type http://www.routerlogin.net and click Enter.
2. Enter the router User Name admin and default Password password to open your router’s main settings page.
3. When the main settings page opens, you will be asked if you want to “Check for Update.” Click Cancel. You can always check for new firmware later after you are connected to the Internet.
4. Select the first menu item on the left: Setup Wizard. Make sure Yes is selected. Then click Next and follow the prompts to complete the Setup Wizard.

Set up wireless security
You should set up a secure wireless network. Once your router security is established, your wireless laptops, gaming devices (such as Wii or PlayStation 3 with wireless), or other wireless equipment can safely and securely connect to the Internet.
1. From the main menu page, select Wireless Settings.*

Connect Wireless Devices to Your Router
Enter your wireless information here:

Wireless Network Name (SSID)
Wireless Security Passphrase

If you don’t remember your Passphrase, type http://www.routerlogin.net into your browser and log in by entering your User Name admin and Password (default is password). Then, select Wireless Settings to retrieve your Passphrase.

You can add wireless computers and other equipment to your wireless network:
1. Open the wireless software that manages your wireless connections on the wireless device (iPhone, laptop computer, gaming device) that you want to connect to your router.
2. The wireless software will scan for all wireless networks in your area. Look for your network—the one you named when you set up your router. Select it.
3. If you set up security, you will be prompted for a Passphrase or network key. Enter the Passphrase you selected and click Connect.

If your wireless device supports WPS (WiFi Protected Setup)—NETGEAR calls this method Push ‘N’ Connect—you might be prompted to press a WPS button on the router instead of entering a Passphrase. Then:
1. Press the WPS button on the router. It will look similar to or .
2. Within 2 minutes, follow the wireless software instructions on the wireless device to complete the WPS process.

The device will then be connected to your router. Repeat this process to add other wireless devices.
