1) Activate Your Account

Online
On a computer that is connected to the Internet, go to att.com/gophone in the device’s browser.
Under Activate Account select mobile hotspot and follow the prompts to create an account.

By Phone
Call 866-707-5550 to activate your account.

Your Account Passcode
Your mobile hotspot will be assigned a wireless phone number.
The last four digits of your wireless number will be your account passcode.
You will need this passcode to manage your account.
For security, we recommend that you change this to a secure passcode not related to the wireless number assigned to this device.

Note: To begin using service, please be sure to add sufficient money to cover the plan you selected. If you do not add money to your account within 26 days of activation, your account will be canceled.

2) Connect to the Internet

Turn on your mobile hotspot
Press and hold the Power button for 2 seconds.

Note: The screen displays the hotspot’s Wi-Fi network name and password.

On your laptop or other wireless device
Open your Wi-Fi/network connection manager.
Find your mobile hotspot’s Wi-Fi network name (ATT-WIFI-XXXX) and connect.
Enter your mobile hotspot’s Wi-Fi password.
Launch your Internet browser.

Note: The screen goes dark to save power. Press and release the Power button to wake the screen.

3) Manage Your Account

Check your balance, buy a data package, add money, and more
Visit att.com/mygophone or dial 866-707-5550.
For additional information visit att.com/GoMobileData.

Renew your plan
Your plan automatically renews on your rate plan renewal date. To ensure continuous service, be sure to have enough money in your account to cover your rate plan charge.
If you need more data before your rate plan renewal date, you can purchase a data package.

Add money to your account
Auto Refill is an easy option that keeps your account active while keeping you in charge. You can use a credit or debit card and choose the amount you want to refill.
Use a credit/debit card for a one-time refill.
To load funds from a GoPhoneRefill Card, visit att.com/mygophone or call 800-901-9878. Refill cards are available at retail locations nationwide.

Printed in China
View Device Information

View basic settings and alerts on the LCD screen, including the following:

- Wi-Fi name and password
- New messages
- Alerts
- Find hotspot’s wireless number (About)

Press the Navigation button ( ) to scroll through the screens.

Network Indicators

Your 4G LTE wireless device will display one of the following network indicators to let you know which of AT&T's wireless networks you are connected to.

- Connected to AT&T’s 4G LTE network.
- Connected to AT&T’s HSPA+ network.

Advanced Settings — In Your Browser

Change advanced settings such as the Wi-Fi network name and password, the maximum number of devices, and more, via the AT&T Wi-Fi Manager web interface.

1. Connect a Wi-Fi device to your mobile hotspot.
2. Type http://attwifimanagement in the connected device’s browser.
3. Login is attadmin.

Wi-Fi Passwords

Hide password
1. On your Wi-Fi device, type http://attwifimanagemen in the browser bar.
2. Login in as administrator. Default login is attadmin.
3. Select Wi-Fi on the left-side menu.
4. Select Options.
5. In the Main section next to Broadcast Network Name, click the radio button next to Hide.
6. Click Submit.

Change Wi-Fi network name and password
1. On your Wi-Fi device, type http://attwifimanagemen in the browser bar.
2. Login in as administrator. Default login is attadmin.
3. Select Wi-Fi on the left-side menu.
4. In the Wi-Fi Info section, click Edit.
5. In the Main section, type your new Wi-Fi network name and password.
6. Click Submit.

Advanced Connection Options

Guest Wi-Fi
You can give guests one-time access to your mobile hotspot by setting up a Guest Wi-Fi network:

1. On your laptop (or other Wi-Fi device), type http://attwifimanagement in the browser bar.
2. Log in as administrator. Default login is attadmin.
3. Select Wi-Fi on the left-side menu.
4. Select Options.
5. Check the box next to Enable secondary Wi-Fi network.
6. Click Submit.

Advanced Connection Options (continued)

Block device access
To prevent a device from reconnecting to the mobile hotspot, add it to the hotspot’s blocked list:

1. On your laptop (or other Wi-Fi device), type http://attwifimanagement in the browser.
2. Login in as administrator. Default login is attadmin.
3. A list of devices connected to the main Wi-Fi and guest Wi-Fi networks displays on the home screen.
4. Click on the device you want to block.
5. Follow the displayed instructions to block the device.

Limited 4G LTE availability in select markets. 4G speeds delivered by LTE, or HSPA+ with enhanced backhaul, where available. Compatible data plan required. LTE is a trademark of ETSI. Learn more at att.com/network.

A network indicator does not necessarily mean that you will experience any particular upload or download data speeds. Actual upload and download data speeds depend upon a variety of factors, including the device, network utilization, file characteristics, terrain, etc. Learn more at wireless.att.com/learn/articlesresources/wireless-terms.jsp and from your AT&T Wireless Customer Agreement, Section 3.2 Where and How Does AT&T Service Work.
