**Quick Start Guide**

**Model CBK40**

**May 2018**

**Activate Your Internet Service**

1. Collect your Internet service provider (ISP) account information.
2. Turn off and disconnect existing modems and routers.
3. Connect a coaxial cable.
4. Connect the power adapter.
5. Wait for the Online LED to light solid blue.
6. Connect your computer or mobile device to the Orbi cable modem router with Ethernet or WiFi:
   - Ethernet: Use an Ethernet cable to connect a computer or an Ethernet port on the cable modem router.
   - WiFi: Use the WiFi network name (SSID) and password on the cable modem router label to connect.
7. Launch a web browser and set up your cable modem router:
   - You are automatically redirected to the cable modem router web interface. If you're not redirected, enter orbilogin.com or 192.168.1.1 in the address field of the web browser.
   - Follow the prompts. You are asked to do the following:
     - Agree to the Terms and Conditions
     - Place and sync your satellite.
   - For more information about the satellite ring LED colors during the sync process, see **Satellite Ring LED Sync Colors**
   - Change your router's admin credentials and set up security questions.
   - Set up your WiFi network name and password.
8. Make sure that you can log in to the cable modem router web interface after the setup.
   - A new web browser window, enter orbilogin.com or 192.168.1.1 and then enter the cable modem router admin user name and password.
   - If the BASIC Home page displays, you are ready to activate your Internet service.
9. Activate your Internet service:
   - For information about how to activate your Internet service, see **Activate Your Internet Service**

**Satellite Ring LED Sync Colors**

After the satellite’s ring LED lights white while the satellite attempts to sync with the cable modem router. Then the ring LED lights one of the following colors for about three minutes and then turns off:

- **Blue**: The cable modem router and satellite successfully synced, and the connection between the cable modem router and satellite is good.
- **Amber**: The cable modem router and satellite successfully synced, and the connection between the cable modem router and satellite is fair. Consider moving the satellite closer to the cable modem router.
- **Magenta**: The cable modem router and satellite failed to sync. Move the satellite closer to the cable modem router and try again.

**ISP Contact Information**

Note: Your ISP’s contact information might change. You can also find the contact information in your monthly Internet service billing statement.

1. Visit your ISP's website and follow the onscreen instructions to activate your Internet service.
2. To determine the accurate Internet speed, visit your ISP’s speed test website and perform a speed test.

**Activate Your Internet Service**

Before you start the self-activation process, collect the following information:

- Your ISP account information
- Cable modem router model number, which is CBK40
- Cable modem router serial number
- Cable modem router MAC address

Your cable modem router’s serial number and MAC address are on the cable modem router label.

The following table lists contact information for ISPs that support your cable modem router.

---

**Set Up and Activate Using the NETGEAR Orbi App**

Set up your Orbi cable modem router and satellite and activate your Internet service with the NETGEAR Orbi app.

If you do not want to use the NETGEAR Orbi app, set up your cable modem router and satellite using the instructions in **Set Up Using the Orbi Cable Modem Router Web Interface**, and activate your Internet service using the instructions in **Activate Your Internet Service**.

1. Scan a QR code or search for NETGEAR Orbi in the Apple App Store or Google Play Store.
2. Download and launch the NETGEAR Orbi app on your mobile device and follow the prompts.
Support
Thank you for purchasing this NETGEAR product. You can visit www.netgear.com/support to register your product, get help, access the latest downloads and user manuals, and join our community. We recommend that you use only official NETGEAR support resources.

Customer-owned cable modem routers might not be compatible with certain Internet service providers (ISPs).

Check with your ISP to confirm that this NETGEAR cable modem router is allowed on your ISP’s network.

For regulatory compliance information, visit http://www.netgear.com/about/regulatory/

See the regulatory compliance document before connecting the power supply.

Package Contents

- Power adapter for CBR40
- Power adapter for RBS20
- Ethernet cable

Orbi Cable Modem Router Overview

1. Ring LED (not shown in image)
2. Power LED
3. Downstream LED
4. Upstream LED
5. Online LED
6. Sync button (also used for WPS connection)
7. Ethernet ports
8. Coaxial cable connector (the satellite does not include a coaxial cable connector)
9. Reset button
10. DC power connector
11. Power On/Off button
12. Power LED

Orbi Satellite Overview

- Solid blue: The cable modem router is receiving power and is functioning normally.
- Off: The cable modem router is not receiving power.
- Solid red: The cable modem router is too warm and might overheat.

Orbi Cable Modem Router LEDs

Power
- Solid blue: The cable modem router is receiving power and is functioning normally.
- Off: The cable modem router is not receiving power.
- Solid red: The cable modem router is too warm and might overheat.

Downstream
- Solid amber: One downstream channel is locked.
- Solid blue: Two or more downstream channels are locked.
- Blinking blue: The cable modem router is scanning for a downstream channel.
- Off: No downstream channel is locked.

Upstream
- Solid amber: One upstream channel is locked.
- Solid blue: Two or more upstream channels are locked.
- Blinking blue: The cable modem router is scanning for an upstream channel.
- Off: No upstream channel is locked.

Online
- Solid blue: The cable modem router is online.
- Blinking blue: The cable modem router is synchronizing with the cable provider's cable modem termination system (CMTS).
- Off: The cable modem router is offline.

Note: If the Downstream and Upstream LEDs blink blue after the Online LED lights solid blue, the downstream and upstream channels are in partial service.
