Set up and activate using the NETGEAR Orbi app

Set up your Orbi cable modem router and satellite and activate your Internet service with the NETGEAR Orbi app.

**Note:** Do not attempt to mount or hang your cable modem router or satellite on the wall or ceiling. Doing so might create a hazardous situation and might damage your product, which might not be covered by NETGEAR’s warranty.

If you do not want to use the NETGEAR Orbi app, set up your cable modem router and satellite using the instructions in **Set up and activate using Orbi cable modem router web interface**.

1. Scan a QR code or search for NETGEAR Orbi in the Apple App Store or Google Play Store.
2. Download and launch the NETGEAR Orbi app on your mobile device and follow the prompts.

**Quick Start Guide**

Model CBK752

July 2020

2. Download and launch the NETGEAR Orbi app on your mobile device and follow the prompts.

1. Connect the power adapter to the cable modem router and plug the power adapter into an electrical outlet.

2. Connect the power adapter to the cable modem router and plug the power adapter into an electrical outlet.

3. When it is complete, the Power LED lights solid white.

4. Connect a coaxial cable to the coaxial cable connector on the cable modem router to the cable wall outlet.

6. Launch a web browser and set up your cable modem router.

5. Connect your computer or mobile device to the Orbi cable modem router with WiFi or Ethernet:
   - **WiFi:** Use the WiFi network name (SSID) and password on the cable modem router label to connect.
   - **Ethernet:** Use an Ethernet cable to connect a computer to an Ethernet port on the cable modem router. (The computer must have an Ethernet port.)

4. When the Online LED lights, your Orbi Satellite is ready to light solid white.

5. When the Online LED lights, your Orbi Satellite is ready to light solid white.

Note:

- Ethernet port on the cable modem router.

6. Launch a web browser and set up your cable modem router. You are automatically redirected to the cable modem router web interface. If you’re not redirected, enter orbilogin.com or 192.168.1.1 in the address field of the web browser. Follow the prompts. You are asked to:
   - Agree to the Terms and Conditions.
   - Place and sync your satellite.

For more information about the satellite’s ring LED colors during the sync process, see Orbi Satellite LEDs on page 5.

5. Connect your computer or mobile device to the Orbi cable modem router with WiFi or Ethernet:
   - **WiFi:** Use the WiFi network name (SSID) and password on the cable modem router label to connect.
   - **Ethernet:** Use an Ethernet cable to connect a computer to an Ethernet port on the cable modem router. (The computer must have an Ethernet port.)

6. Launch a web browser and set up your cable modem router. You are automatically redirected to the cable modem router web interface. If you’re not redirected, enter orbilogin.com or 192.168.1.1 in the address field of the web browser. Follow the prompts. You are asked to:

Note to CATV system installer: This reminder is provided to call the CATV systems installer’s attention to Section 820-93 of the National Electrical Code, which provide guidelines for proper grounding and in particular, specify that coaxial cable shield shall be connected to the grounding system of the building, as close to the point of cable entry as practical.

Ethernet cable

Package contents
- Power adapter for CBR750
- Power adapter for RBS750

Orbi Cable Modem Router overview
- Power LED
- Downstream LED
- Upstream LED
- Online LED
- Sync button (also used for WPS connection)

Orbi Satellite overview
- Ring LED
- Power LED
- Downstream LED
- Upstream LED
- Online LED
- Reset button
- Coaxial cable connector

Orbi Cable Modem Router LEDs
- **Power**: Solid white. The cable modem router is receiving power and is functioning normally.
- **Solid red**: The cable modem router is too warm and might overheat.
- **Solid amber**: One downstream channel is locked.
- **Solid white**: Two or more downstream channels are locked.
- **Blinking white**: The cable modem router is scanning for a downstream channel.
- **Off**: No downstream channel is locked.
- **Solid amber**: One upstream channel is locked.
- **Solid white**: Two or more upstream channels are locked.
- **Blinking white**: The cable modem router is scanning for an upstream channel.
- **Off**: No upstream channel is locked.
- **Solid white**: The cable modem router is online.
- **Blinking white**: The cable modem router is synchronizing with the cable provider’s cable modem termination system (CMTS).
- **Off**: The cable modem router is offline.

Note: If the Downstream and Upstream LEDs blink white after the Online LED lights solid white, the downstream and upstream channels are in partial service.
