Let's get started

Nighthawk app setup

If you have an iOS or Android mobile device, you can download the Nighthawk app and connect to your extender's default WiFi network to complete setup.

1. On your mobile device, scan the QR code to download the Nighthawk app.

2. Plug in your extender.

3. Connect your mobile device to the NETGEAR_EXT WiFi network.

4. Open the Nighthawk app and follow the step-by-step instructions to set up your extender.

Alternate setup methods

If you don't have a Nighthawk app compatible mobile device, or you prefer to use a different setup method like Wi-Fi Protected Setup (WPS) or the extender web interface, see the next page.
Alternate setup methods

WPS push-button setup

If your router has a WPS or Sync button, Wi-Fi Protected Setup (WPS) connects your extender to your existing network with the press of a button.

1. Plug in your extender and wait for the Power LED to light solid green.

2. Locate the WPS button on your extender and router.

WPS

3. Press the WPS button on your extender.

4. Within two minutes, press the WPS or Sync button on your router to connect the first WiFi band.

5. After the Router Link LED lights solid green, repeat steps 3 and 4 to connect the second WiFi band.

6. Join your WiFi network and visit http://mywifiext.local to register your device, set up a NETGEAR account, and get the latest updates. Setup is complete!
Web user interface & additional help

For detailed instructions on web user interface setup and additional help for all installation methods, scan the QR code or visit NETGEAR.com/extendersetup.

Device Overview

A	WPS button	Press to search for a WPS connection with another WPS device.
B	Reset button	Press and hold for seven seconds to reset to factory settings.
C	Ethernet port	Use to connect a wired Ethernet LAN device to your network.
