1. Register with the NETGEAR Insight app
   1. Search for NETGEAR Insight and download the latest app.
   2. Set up a NETGEAR account if you do not have one.
   3. Tap the menu in the upper-left corner.
   4. Tap REGISTER ANY NETGEAR DEVICE.
   5. Use the camera on your mobile device to scan the serial number bar code, or enter the serial number located on the bottom of the switch.
   6. Tap GO.

      The switch is registered and added to your account. You can now view the switch in the NETGEAR Insight app.

      Note: Because this is an unmanaged switch, you cannot configure or manage it in NETGEAR Insight.

2. Connect the switch

   Sample connections
   GS324v2 switch

   Desktop
   Router
   Internet
   IP camera
   Gaming console
   Laptop
   Deskpot
   ReadyNAS
   SmartTV

   This switch is designed for indoor use only. If you want to connect it to a device located outdoors, the outdoor device must be properly grounded and surge protected, and you must install an Ethernet surge protector inline between the switch and the outdoor device. Failure to do so can damage the switch.

   Before connecting this switch to outdoor cables or devices, see https://kb.netgear.com/000057103 for safety and warning information.

3. Check the LEDs

   When you connect the power adapter to the switch and plug it into an electrical outlet, the LEDs indicate the status.

<table>
<thead>
<tr>
<th>LED</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Power LED</td>
<td>On. The switch is receiving power.</td>
</tr>
<tr>
<td></td>
<td>Off. The switch is not receiving power.</td>

Mount the switch in a rack

We recommend that you use the brackets and screws that came with the switch.
1. Attach the supplied mounting brackets to the sides of the switch.
2. Insert the supplied small screws through each bracket and into the bracket mounting holes in the switch.
3. Align the mounting holes in the brackets with the holes in each rack, and insert the provided two pan-head screws (you can choose from two types of two pan-head screws) with nylon washers through each bracket and into the rack.
4. Tighten the screws with a No. 1 Phillips screwdriver to secure each bracket.
5. Tighten the screws with a No. 2 Phillips screwdriver to secure mounting brackets to the rack.

Mount the switch on a wall

We recommend that you use the wall-mount screws that came with the switch.
1. Locate the two mounting holes on the bottom panel of the switch.
2. Mark and drill two mounting holes in the wall where you want to mount the switch. The two mounting holes must be 7.01 in. (178 mm) apart, center-to-center.
3. Insert the supplied anchors into the wall and tighten the screws with a No. 2 Phillips screwdriver. Leave about 0.125 in. (4 mm) of each screw protruding from the wall so that you can insert the screws into the holes on the bottom panel.

Note: GS324v2 screws are 6.3 mm in diameter, 27 mm in length.
