Connect the Switch to Your Network

1. Connect a LAN port on the switch to a LAN port on a router that is connected to the Internet.
2. Connect your devices to the other LAN ports on the switch.
3. Connect the power adapter to the switch and plug the power adapter into an electrical outlet.
4. Turn on the switch by moving the OFF/ON slider next to the DC input connector to the ON position. The blue Power LED on the front of the switch lights.

The port LEDs light as follows:
- Off. No link.
- Solid green. 1 Gbps link
- Solid yellow. 100 or 10 Mbps link
- Blinking green. 1 Gbps traffic
- Blinking yellow. 100 or 10 Mbps traffic

Note: To turn off all LEDs, press the LED On/Off button.
Wall-Mount the Switch

1. Locate the two mount holes on the bottom panel of the switch.
2. Locate the M3.5 x 16 mm screws and anchors in the switch package.
3. Mark and drill two mounting holes in the wall where you want to mount the switch.
   The two mounting holes must be at a precise distance of 5.8 in. (147.5 mm) from each other.
4. Insert the anchors into the wall and tighten the screws with a No. 2 Phillips screwdriver.
   Leave about 0.125 in. (about 4 mm) of each screw protruding from the wall so that you can insert the screws into the holes on the bottom panel.
5. Line up the holes on the bottom panel with the screws in the wall and mount the switch to the wall.

Specifications
