Wireless Digital Media Player

- *Help is there when you need it! NETGEAR provides 24x7 technical support* in English, with selected local language support during office hours.*

Enjoy Digital Music, Pictures, and Movies in Your Living Room

NETGEAR's Wireless Digital Media Player wirelessly connects your stereo and television to your home computer network so you can access digital music, pictures, and movies from your living room. Time to relax? Find the most comfortable seat in your home, and sit back with your family and friends to share your photos, videos, and music files, and stream music from the Internet to your TV. The Wireless Digital Media Player is compatible with your 802.11b or 802.11g wireless network and features 108 Mbps Super G™ enhanced throughput for streaming high-quality video. Very simple to set up and use, the media player connects to your TV without interfering with your video/DVD player hookup. Easy to install software automatically finds all your media files on any networked PC and collects them into one complete database so you don't have to do the work. With the convenient remote control you can select what to watch or listen to without even getting out of your chair.

Untethered Enjoy all kinds of media entertainment without being tied to your computer. NETGEAR's Wireless Digital Media Player lets you scroll through the pictures stored on your computer, share your digital slideshows and music files, and stream movies and Internet radio with a whole roomful of friends and family.

Fast & Easy Connect the cable to your TV, install the software on one PC, and you're ready to enjoy the entire range of digital entertainment. The player's media server software automatically finds all the digital image and music files stored on any networked PC in your home. It recognizes your existing music file organization by title, artist, album, genre, and playlist and preserves your photo and video file organization, as well.

Crystal Clear Hear and see everything at its best! Enjoy 100% digital, high-quality sound through your stereo speakers and get the full impact of photos and films as you view them on the large screen of your TV. Ideal for streaming high-quality video, 108 Mbps Super G provides enhanced throughput for a superior viewing experience.

Fully Equipped Protected with hardware-based Wired Equivalent Privacy (WEP) 64-bit and 128-bit encryption security. Remote functionality so you can easily browse and program your entertainment from across the room.
