• None. Not connected

Battery
This icon is solid when the battery is fully charged.
Battery hot while charging
The battery is hot, but is being charged.
Battery hot, not charging
The battery is too hot and is not being charged.

Alert
To view system alerts, visit the mobile router’s home page at http://m2login.net.

Download the NETGEAR Mobile app
Use the NETGEAR Mobile app to change your WiFi network name and password. You can also use the app to check your data usage and enable the travel router feature.

1. Connect your mobile device to the Internet.
2. Download the NETGEAR Mobile app from netgear.com/mobileapps.

Log in to the Nighthawk M2 mobile router
1. Launch a web browser from a device that is connected to the Nighthawk M2 mobile router.
2. In the address field of the web browser, enter http://m2login.net or http://192.168.1.1.
3. In the Sign In field, enter the admin password and click the Sign In button.

See the label located under the battery for the initial admin password. We recommend that you change it to a password that you want to use.

Upload media files to the Nighthawk M2 mobile router
Use the MyMedia interface to upload files to the Nighthawk M2 mobile router.

1. Connect your mobile device to the Internet.
2. Open the MyMedia interface on your mobile device.
3. Drag and drop your files onto the page.

Use the Nighthawk M2 mobile router to charge devices
The battery power is low on your smartphone or other device, you can give it a boost by connecting it to the mobile router’s USB port (type A) or USB port (type C).

Jump boost begins automatically once the devices are connected. Note that Jump boost is only supported when the mobile router contains a battery.
