Set up your mobile router

1. Press and hold the Power button for 2 seconds.

   ![Power button]

   Congratulations on purchasing your new mobile router. You’ll need to set up your network first.

   To better safeguard your network, the first time you turn on your mobile router, you are asked to set up your login credentials.

2. Follow the onscreen instructions to customize your mobile router settings.

   ![Onscreen instructions]

   Customize your WiFi
   To better safeguard your network security, we recommend you change or delete credentials to your own custom credentials.

Install the battery

1. Verify the SIM orientation as shown on the product label.
2. Insert the nano SIM card.
   The nano SIM card must have an active data plan with your operator.
3. Insert the battery.
4. Install the back cover.
5. To charge the battery, connect the USB cable to the mobile router and then plug it into either:
   - A wall socket, using the AC adapter (faster charge option).
   - A USB port on your laptop.

LCD home screen

The home screen displays your mobile router’s WiFi network name and password, and the mobile network signal strength and connection type.

<table>
<thead>
<tr>
<th>Signal strength</th>
<th>Mobile network</th>
<th>Battery</th>

<tbody>
<tr>
<td>WiFi network name and password</td>
<td>QR code for quick connect to WiFi</td>
<td></td>
</tr>
</tbody>
</table>

Use the battery or AC power

This mobile router can operate on battery when you’re away from your home or the office. The Power Manager settings allow you to further optimize battery life.

This mobile router can also operate without a battery using the supplied AC adapter. For extended periods on AC power, we recommend removing the battery to extend the battery life.
Connect to the Internet
The mobile router LCD screen goes dark to save power. A quick press and release of the Power button wakes the screen.

**QR code connect from a smartphone**
1. Tap the QR code icon on the mobile router’s LCD home screen.

A QR code displays.
2. Point your phone’s camera to the QR code. Your phone connects to the mobile router WiFi network.

**On your laptop or other WiFi-capable device**
1. Open your WiFi network manager.
2. Find your mobile router’s WiFi network name (NTGR_XXXX) and connect.
3. Enter your mobile router’s WiFi password.

**NOTE:** To reduce power consumption and extend the battery life, this mobile router by default has Ethernet disabled. You can go to Power Manager to change to custom profile settings.

LCD WiFi Manager
You can manage the WiFi network and change the WiFi settings from the LCD screen.

**Change the WiFi network name and password**
1. On the home screen, tap the WiFi tile.

If your device is not connecting to this mobile router, we suggest enabling Dual-Band (2.4 & 5 GHz) in WiFi Band settings.

**NOTE:** To reduce power consumption and extend the battery life, this mobile router is default set to the WiFi 5 GHz Only band.

LCD Settings
**View or change the settings**
On the home screen, tap the Settings tile.

From the Settings page, tap Airplane Mode, Security, Mobile, or Screen to view or change the settings. Tap More to view Device Information. Tap Software to check for software updates to ensure your device is always up to date.

Web Admin Portal
You can use a web browser to view and change more advanced mobile router settings.

**Log In**
1. To find the URL for the Web Admin Portal, on your mobile router, tap Settings > More > Device Information. The URL displays. It is either http://mywebui.net or http://192.168.1.1
2. On a WiFi-capable device that is connected to your mobile router, type the URL in the browser bar.
3. Log in as administrator.

Support and Community
From the Web Admin Portal home page, click the three-dot icon in the upper-right corner to access help and support files.

Direct all calls and support for PINs, SIM card registration, account and billing information, network services, and other general enquiries to Telstra at 13 22 00.

Direct general enquiries to Telstra at livechat.telstra.com.
See your warranty card for warranty and service information.
For additional information, visit netgear.com/support to access the user manual and to download firmware updates.
You can also check out our NETGEAR Community for helpful advice at community.netgear.com.

Regulatory and Legal
For regulatory compliance information, visit https://www.netgear.com/about/regulatory/.
See the regulatory compliance document before connecting the power supply.
For NETGEAR’s Privacy Policy, visit https://www.netgear.com/about/privacy-policy.
By using this device, you are agreeing to NETGEAR’s Terms and Conditions at https://www.netgear.com/about/terms-and-conditions. If you do not agree, return the device to your place of purchase within your return period.

Manage settings using the NETGEAR Mobile app
Use the NETGEAR Mobile app to change your WiFi network name and password. You can also use it to play and share media, and access advanced mobile router features.

1. Make sure your mobile device is connected to the Internet.
2. To download the NETGEAR Mobile app, scan the QR code below or visit netgear.com/mobileapps.
