What's in the Box

- Nighthawk® M6 Pro with pre-installed SIM card
- Battery cover
- Battery
- USB Type C cable
- AC adapter

Get to Know Your Mobile Hotspot

Install the Battery

- 1 Insert the battery.
- 2 Install the back cover.

- 3 To charge the battery, connect the USB cable to the USB port and the AC adapter, and plug the AC adapter into a power outlet.

Note: The mobile hotspot comes with a preinstalled SIM card. The SIM must be activated on a data plan with AT&T.

Set Up Your Mobile Hotspot

You can use the mobile hotspot LCD screen to change settings such as the WiFi password, WiFi Manager login password, and WiFi standby time.

- 1 Press and hold the **Power** button for 2 seconds.

To better safeguard your network, the first time you turn on your mobile hotspot, you are asked to set up your login credentials.

- 2 Follow the instructions to customize your mobile hotspot settings.

Home Screen

The Home screen displays the mobile hotspot's WiFi network name and password, and the AT&T wireless network signal strength and connection type.

Use the battery or AC power

Rely on battery power when you're away from home or the office. The Power Manager lets you optimize battery life.

Your mobile hotspot can operate without the battery. Remove the battery and plug the provided AC adapter into a power outlet. Refer to the user manual for more details.

Connect to the Internet

Note: The mobile hotspot Home screen goes dark to save power. Press and release the **Power** button to wake the screen.

QR code connect from a smartphone

- 1 Tap the QR code icon on the mobile hotspot LCD Home screen.

QR code for quick connect to WiFi

- 2 A QR code displays.
- 2 Point your phone's camera at the QR code. Your phone connects to the mobile hotspot WiFi network.
3. Launch your Internet browser

On your laptop or other WiFi device

- 1 Open your WiFi network connection manager.
- 2 Find your mobile hotspot's WiFi network name (ATT-WIFI-XXXX) and connect.
- 3 Enter your mobile hotspot's WiFi password.
- 4 Launch your Internet browser.

High data transfer rates may cause your mobile hotspot to feel warm to the touch. This is normal.

LCD WiFi Manager

You can manage the WiFi network from the LCD screen.

Change the WiFi network name and password

- 1 On the Home screen, tap the **WiFi** tile.

2. Tap **WiFi** and then select an available WiFi network.
3. Tap **WiFi Name** and enter your changes.

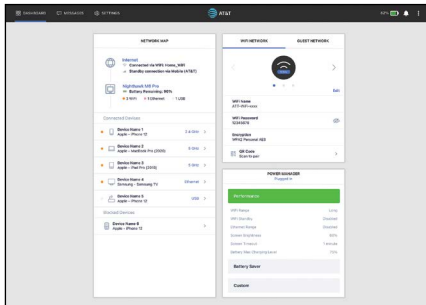

4. Tap **WiFi Password** and enter your changes.

WiFi Manager

You can use a browser to view the device information and messages, and to change the mobile hotspot settings.

Log In

- 1 On the WiFi device that is connected to your mobile hotspot, type <http://attwifimanager/> or <http://192.168.1.1> in the browser bar.
- 3 Log in using your admin password. The default admin login password is **attadmin**.
