Security included. Surprises excluded.

A dual WAN security gateway that bundles cloud-enforced security, cloud management, and support, all in one box, at one price

1	24/7	16	500+
box, one price	tech support included	VLANs supported	concurrent clients

The PR30SG advantage

The PR30SG helps lean IT teams, MSPs serving multiple customers, service branches, and retail chains under 50 users deploy, secure, and manage distributed sites with less complexity. Cloud-enforced security and cloud management ship included, not upsold, so budgets stay predictable from day one.

The PR30SG is built to make security simple, not just affordable

Deploy new sites in minutes with NETGEAR Insight Cloud, manage multiple locations from a single dashboard, and get NETGEAR Exium SASE included for the full first year. Free 24/7 technical support is available from day one, with a 2-hour response SLA through the included one-year Overdrive subscription.

Dual-WAN failover and native WireGuard and OpenVPN support help keep your network secure and connected, all in a silent, fanless, NDAA-compliant design built for small offices and branches.

Key features

- Cloud-enforced security (NETGEAR Exium), included year one
- Zero-touch provisioning via NETGEAR Insight
- Multi-tenant dashboard for managing multiple sites
- Dual-WAN failover and load balancing
- WireGuard and OpenVPN, natively supported
- IPSec site-to-site and client-to-site VPN
- Up to 16 VLANs, 802.1Q
- Up to 16 DHCP servers
- 24/7 phone and online chat support, included
- QoS and basic NAT (SNAT/DNAT)
- Intrusion detection, up to 870 Mbps
- Access controls via NETGEAR Exium
- NDAA (Section 889) compliant hardware
- Fanless, silent design
- 500+ concurrent clients supported
- NETGEAR Limited Lifetime Hardware Warranty

Benefits

Security that's already on

Cloud-enforced web filtering, intrusion detection, access controls, and a cloud firewall layer ship included for the first year, powered by NETGEAR Exium. No separate subscription to source or manage.

One dashboard, every client site

NETGEAR Insight Cloud puts every PR30SG deployment, including alerts, policies, traffic, and device health, into one multi-tenant dashboard, so new sites onboard without an on-site visit.

Support that's included, not an upsell

90 days of free 24/7 phone support plus limited lifetime 24/7 online chat support ship with every unit. The included Overdrive plan adds a 2-hour response SLA for teams that need it.

Modern remote access, built in

WireGuard and OpenVPN run natively alongside IPSec, so remote access works without third-party VPN software or extra hardware per site.

Reliable by design

Dual-WAN failover and load balancing keep sites online through an ISP outage, automatically and without manual intervention.

Compliance-ready hardware

Built in line with NDAA Section 889 requirements, the PR30SG deploys in healthcare, finance, education, and government-adjacent environments where component origin matters.
