Troubleshooting

If you're having problems with the installation, try the following:

- Turn off your modem and Orbi router and disconnect them. Reboot your modem. Reconnect your Orbi router to your modem, and try installing with the Orbi app again.
- If you're still unable to install your Orbi router using the Orbi app, install it manually using the router web interface. Visit orbilogin.com to access the router web interface.

If you already own another Orbi router and you used the Orbi app before, go to the dashboard and tap **NEW SETUP** to install your new Orbi router.
