

Skype WiFi Phone (SPH101)

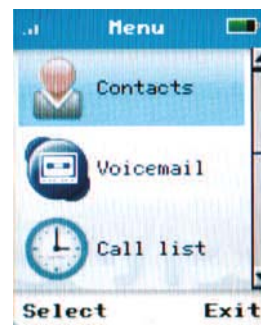

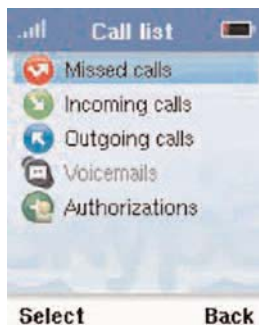

Unlimited free wireless calls to Skype users, no PC required

NETGEAR's Skype WiFi Phone is the world's first wireless Internet phone that can make free calls to other Skype users anywhere in the world, anytime you have WiFi access, without a PC. All of your contacts (up to 200) are shown right on the phone's color display so you will know exactly who is online. You will also be more available for your friends to call, because you no longer have to be on your PC to be connected. You can even make calls to ordinary phones using SkypeOut for just pennies a minute and NO MONTHLY FEES. With the Skype WiFi Phone, NETGEAR makes true mobile wireless Internet telephony a reality.

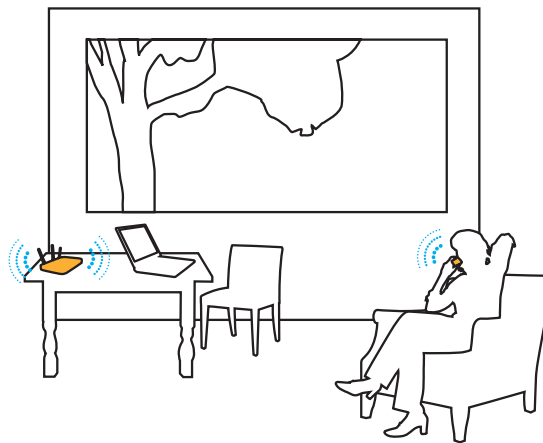

For wherever you have WiFi Access

Now for the first time, a phone that lets you use any WiFi network to which you have access, to talk with anyone else who's also on Skype, anywhere in the world, for absolutely free.

- Call anyone else on Skype, anywhere in the world for free, no PC required
- Make and receive Skype phone calls wherever you have WiFi, wireless Internet access
- Call any phone worldwide at low SkypeOut rates and with NO MONTHLY FEES
- Manage your contact list and displays who's available to talk
- Can forward your calls to your mobile, land line or to another Skype Name

No emergency calling—emergency calls will need to be made by alternative methods. This phone will not function during a power failure or broadband outage. Use of Skype software, SkypeOut and/or SkypeIn is subject to Skype's terms of service and end user license agreement.

Frequently Asked Questions on NETGEAR's Skype WiFi Phone

- Q:** What is Skype WiFi Phone?
- A:** A wireless mobile phone that allows you to make free Internet calls to anyone who also has Skype, anytime you have a WiFi wireless Internet connection.
- Q:** Isn't Skype designed to just work on PCs and laptops?
- A:** Not anymore. Now you can walk around within a WiFi network to which you have access and talk to other Skype users anywhere in the world.
- Q:** On a PC, Skype shows when my contacts are online. How does that work on Skype WiFi Phone?
- A:** An intuitive on-screen menu lets you see the status of up to 200 of your contacts. You can see who is online and available to talk, similar to what you see on a PC.
- Q:** Can I use it to talk with non-Skype users?
- A:** For a pennies a minute and no monthly fee, you can use SkypeOut minutes to call any phone. The SkypeIn option receives calls from non-Skype users. Skype Voicemail takes your calls when you're busy or offline. See www.skype.com for rates.
- Q:** How do I download Skype to the WiFi Phone?
- A:** NETGEAR's Skype WiFi Phone is pre-loaded and ready to use with a wireless network, out of the box.
- Q:** Can I use the NETGEAR Skype WiFi Phone at any WiFi hotspot?
- A:** The Skype WiFi phone does not contain a web browser therefore can not access hotspots that require web-based login or authentication.

* Battery talk and standby times are estimates only and depend on network configuration, signal strength, features used, battery age and condition, charging practices, temperatures to which battery is exposed, and many other factors. Please note that the amount of time a phone is used for calls will affect its standby time. Likewise, the amount of time that the phone is turned on and in standby mode will affect its talk time. For further information please refer to the phone's user guide.
