Orbi Pro WiFi 6 Mini Quick Start

Wall-mount the Orbi Pro WiFi 6 Mini

1. Mark the wall where you want to insert the provided anchors and screws, which must be 2.5 in. (63 mm) apart. Insert the anchors and screws, leaving about 0.25 in. (6 mm) of each screw protruding from the wall.

2. When the screws are placed correctly, the holes at the back of the mounting bracket fit over the protruding screws, allowing you to slide the mounting bracket downward until the tops of the slots are resting on the screws.

3. Connect the Orbi Pro WiFi 6 Mini router to the modem or gateway using an Ethernet cable.

4. Connect the router to power.

CAUTION: You can install the wall mount vertically on a wall only. Do not install the wall mount horizontally or on the ceiling.
1. Connect your WiFi-enabled computer or mobile device to the router using a WiFi or Ethernet cable.

   **WiFi**
   - Use the preset WiFi network name (SSID) and password on the router label. The Power LED on the back of the router lights green.
   - Use an Ethernet cable to connect to the router. For more information on configuring your device through the router web interface, see the Orbi Pro WiFi 6 user manual, which you can download by visiting https://www.netgear.com/support/download.

2. Launch a web browser and type orbilogin.com in the address field. Enter the preset WiFi network name (SSID) and password on the router label.

3. Press the button on the back of the router. The bar LED pulses white.

4. When the bar LED lights blue, the connection between the router and satellite is good. If the bar LED lights amber or magenta, see Orbi Pro WiFi 6 Mini Satellite sync information.

5. Place the satellite at the desired location (optional)

   - Place the satellite at the location where you want WiFi coverage. The satellite must be within a direct line of sight of the router.
   - The connection between the router and satellite is good.
   - The Power LED on the back of the satellite lights green.

6. Use the Insight app on your mobile device to manage and monitor your Orbi Pro WiFi 6 network.

7. Connect each additional satellite to the router (optional)

   - Place the satellite in the desired location.
   - Use an Ethernet cable to connect to the router.
   - For more information, see Wall-mount the Orbi Pro WiFi 6 Mini.

8. Connect your WiFi-enabled computer or mobile device to the router using a WiFi or Ethernet cable.

   **WiFi**
   - Use the preset WiFi network name (SSID) and password on the router label.
   - Use an Ethernet cable to connect to the router.

9. Place the satellite in the desired location (optional)

   - Place the satellite at the location where you want WiFi coverage.
   - The satellite must be within a direct line of sight of the router.
   - The connection between the router and satellite is good.
   - The Power LED on the back of the satellite lights green.

10. Use the Insight app on your mobile device to manage and monitor your Orbi Pro WiFi 6 network.

11. Connect each additional satellite to the router (optional)

   - Place the satellite in the desired location.
   - Use an Ethernet cable to connect to the router.
   - For more information, see Wall-mount the Orbi Pro WiFi 6 Mini.
