Quick Start
Orbi Pro WiFi 6 Mini

Wall-mount the Orbi Pro WiFi 6 Mini

**Package contents**

- Orbi Pro WiFi 6 Mini Router (Model SXR30)
- Ethernet cable
- Power adapter (varies by region)
- Screws
- Wall anchors

**Orbi Pro WiFi 6 Mini Satellite (Model SXS30)**

- Wall mount bracket
- Note: Not included with the SXS30

**Orbi Pro WiFi 6 Mini Router hardware overview**

1. Bar LED
2. Sync button (also used for WPS connection)
3. WAN port that supports 1 Gigabit Ethernet. Use this port for your WAN (Internet) connection.
4. LAN Ethernet ports 1–3
5. DC power connector
6. Power LED
7. Reset button

**Orbi Pro WiFi 6 Mini Satellite hardware overview**

1. Bar LED
2. Sync button (also used for WPS connection)
3. LAN Ethernet ports 1–4
4. DC power connector
5. Power LED
6. Reset button

**Package contents**

- Screws
- Wall anchors

**Note:** Both devices are included in the SXK30, SXK30B3, SXK30B4, or can be purchased separately.

**Orbi Pro WiFi 6 Mini Satellite**

- Note: Both devices are included in the SXK30, SXK30B3, SXK30B4, or can be purchased separately.

**Wall-mount the Orbi Pro WiFi 6 Mini**

**Note:** You can install the wall mount vertically on a wall only. Do not install the wall mount horizontally or on the ceiling.

1. Mark the wall where you want to insert the provided anchors and screws, which must be 2.5 in. (63 mm) apart. Insert the anchors and screws, leaving about 0.25 in. (6 mm) of each screw protruding from the wall.

2. When the screws are placed correctly, the holes at the back of the mounting bracket fit over the protruding screws, allowing you to slide the mounting bracket downward until the tops of the slots are resting on the screws.
Step 1: Connect the Orbi Pro WiFi 6 Mini router

The Orbi Pro WiFi 6 Mini router (model SXR30) can be used as the base station, as a WiFi extender, or as a satellite. If you purchased a kit, the Orbi Pro WiFi 6 satellite (model SXS30) is also included. The router supports WiFi 6 and the satellites support WiFi 6E, so the Orbi Pro WiFi 6 Mini Router Kit can be used to create a WiFi 6 and WiFi 6E mesh network. Read the label on the router that states model SXR30, and on the label on the satellite that states model SXS30.

1. To set up WiFi network with internet, the router must connect to a modem or other gateway that provides Internet.
2. Use an Ethernet cable to connect your modem or gateway to the yellow WAN port on the back of the Orbi Pro WiFi 6 Mini router.
3. Connect the router to a power source.
4. When the bar LED on the front of the router lights solid white, the router's preset WiFi network is enabled.

Step 2: Connect a satellite from a kit (optional)

- The Power LED on the back of the Orbi Pro WiFi 6 satellite lights green.
- The Power LED on the back of your Orbi Pro WiFi 6 Mini router.
- Place the satellite in the desired location.
- If the bar LED lights amber or magenta, see Orbi Pro WiFi 6 Mini Satellite sync information.

Step 3: Set up the WiFi network's Internet connection

1. Connect your WiFi-enabled computer or mobile device to the router using a WiFi or Ethernet connection.
2. Launch a web browser and type https://orbilogin.net in the address field.
3. When the bar LED on the satellite lights blue, the connection between the router and satellite is good. Consider moving the satellite closer to the router.
4. When the bar LED lights magenta and does not light white within a couple of minutes, resync the Orbi Pro WiFi 6 Mini router and satellite.

Step 4: Sync an add-on satellite to the router (optional)

- To enable other Orbi Pro features, manage and monitor your Orbi Pro WiFi 6 network and support devices, you must log in to your Orbi Pro account. Model SXR30 is supported during setup, or if you need more information, visit https://www.netgear.com/support/download/
