Package contents

- Orbi Pro WiFi 6 Router (Model SXR80)
- Orbi Pro WiFi 6 Satellite (Model SXV80)
- Ethernet cable
- Power adapter (varies by region)
- Wall-mount cover
- Wall-mount bracket (bracket and cover come preattached)
- Screws
- Wall anchors

Hardware overview

Orbi Pro WiFi 6 Router

- Bar LED
- Sync button (also used for WPS connection)
- 2.5G/1G LAN Ethernet port 1. Use the port for a high-speed LAN connection.
- 1G LAN Ethernet ports 2–5. You can set up one link aggregation group (LAG) on ports 2 and 3, and another LAG on ports 4 and 5.
- Power LED
- Reset button
- DC power connector

Orbi Pro WiFi 6 Satellite

- Bar LED
- Sync button (also used for WPS connection)
- 2.5G/1G LAN Ethernet port 1. Use the port for a high-speed LAN connection.
- 1G LAN Ethernet ports 2–5. You can set up one LAG on ports 2 and 3, and another LAG on ports 4 and 5.
- Power LED
- Reset button
- DC power connector

Router setup

More setup is complete. The SXK80 pack on the Orbi Pro WiFi 6 router is connected with an Ethernet cable to a modem or gateway, and the router is connected to power.

Prepare the wall mount

Slide the wall mount cover up to detach it from the bracket. Mark the wall where you want to insert the provided anchors and screws, which must be 2.44 in. (62 mm) apart. Insert the anchors and screws, leaving about 0.25 in. (6 mm) of each screw protruding from the wall.

When the screws are placed correctly, the holes at the back of the mounting bracket fit over the protruding screws, allowing you to slide the mounting bracket downward until the tops of the slots are resting on the screws.

When the screws are inserted correctly, the holes at the back of the mounting bracket fit over the protruding screws, allowing you to slide the mounting bracket downward until the tops of the slots are resting on the screws.

CAUTION: You must install the wall mount vertically on a wall only. Do not install the wall mount horizontally or on the ceiling.

Wall-mount the Orbi Pro WiFi 6
Step 1: Connect the Orbi Pro WiFi 6 router

The Orbi Pro WiFi 6 router (model SXR80) can be used alone, or supports up to six satellites.

1. Place the satellite in the desired location.
2. Connect the satellite to a power source, and confirm that the bar LED lights blue.
3. If the satellite bar LED lights amber, indicating that the connection is fair but not good, consider moving the satellite closer to the router.
4. Press the button on the back of the satellite, and within two minutes, press the button on the back of the router.

Step 2: Connect an Orbi Pro WiFi satellite from a kit (optional)

If you purchased a satellite separately, see Step 4. Sync an add-on satellite to the router (optional).

1. Connect your WiFi-enabled computer or mobile device to the router using a WiFi or Ethernet connection:
   - Ethernet
   - WiFi

2. Launch a web browser and type 192.168.1.1 in the address field.
3. If the router's bar LED lights white, then lights blue to indicate a good connection, and then turns off:
   - Blue
   - White

4. If the satellite bar LED lights magenta, indicating the satellite was unable to connect to the router. Move the satellite closer to the router.

Step 3: Set up the network connection

1. Connect your Orbi Pro WiFi-enabled computer or device to the router's WiFi network:
   - WiFi

2. Use an Ethernet cable to connect your modem or gateway to the yellow WAN port on the back of your Orbi Pro WiFi 6 router.

3. The Orbi Pro WiFi 6 router (model SXR80) can be used alone, or supports up to six satellites.

4. Launch a web browser and type 192.168.1.1 in the address field.

   - NOTE: A security warning displays, which you can dismiss. For information about how to dismiss the message, visit https://kb.netgear.com/000045858.

5. From the list, select the Orbi Pro WiFi 6 router:
   - NOTE: If this product is sold in Canada, you can access this document in Canadian French at https://www.netgear.com/support/download/. (If this product is sold in Canada, you can access this document in Canadian French at https://www.netgear.com/support/download/.)

6. If you proceed, your settings are applied, and the devices restart.

7. The interactive Internet setup process starts. This process can take several minutes to complete.

   - NOTE: For NETGEAR’s Privacy Policy, visit https://www.netgear.com/about/privacy-policy.

8. When the Orbi Pro WiFi 6 satellite tries to sync with the router, the bar LED lights one of the following colors for several minutes, and then turns off:
   - Blue
   - Magenta

9. When the bar LED on the front of the satellite lights, the connection between the router and satellite is good if the bar LED lights an amber color.

10. To enable other Orbi Pro features, and manage and monitor your Orbi Pro WiFi 6 network:
