Router setup
When setup is complete, the WAN port on the Orbi Pro WiFi 6 router is connected with an Ethernet cable to a modem or gateway, and the router is connected to power.

Prepare the wall mount
You can install the wall mount vertically on a wall only. Do not install the wall mount horizontally or on the ceiling.

Wall-mount the Orbi Pro WiFi 6
When setup is complete, the WAN port on the Orbi Pro WiFi 6 router is connected with an Ethernet cable to a modem or gateway, and the router is connected to power.

Prepare the wall mount
You can install the wall mount vertically on a wall only. Do not install the wall mount horizontally or on the ceiling.

Wall-mount the Orbi Pro WiFi 6
When setup is complete, the WAN port on the Orbi Pro WiFi 6 router is connected with an Ethernet cable to a modem or gateway, and the router is connected to power.
**Step 1: Connect the Orbi Pro WiFi 6 router**

- Connect the satellite to a power source.
- Place the satellite approximately 10 ft. away from the router, facing the router, with a direct line of sight.

**Satellite bar LED sync information**

- If the bar LED lights amber or magenta, see the user manual, which you can download by visiting netgear.com/support.

**Troubleshooting**

- If the type LED lights magenta and does not light white within a couple of minutes, move the router or another Orbi Pro satellite that is connected to the router.

**Step 2: Connect an add-on satellite to the router (optional)**

- Press the Sync button on the back of the satellite, and within two minutes, press the Sync button on the back of the router.

**Satellite bar LED sync information**

- If a security warning displays, see https://kb.netgear.com/000062980 for information on how to dismiss the message.

**Step 3: Setup the Orbi Pro WiFi 6 network’s Internet connection**

1. Connect the Orbi Pro WiFi 6 router (model SXR80) to the Internet using an Ethernet cable.
2. Use an Ethernet cable to connect your modem or gateway to the yellow WAN port on the back of your Orbi Pro WiFi 6 router.
3. Connect the router to a power source.

**The Bar LED on the front of the satellite pulses white while booting up.**

**WiFi 6 router.**

- Use the preset WiFi network name (SSID) and password on the router label to connect to the Orbi WiFi network.

**3. When the bar LED on the satellite lights blue, the connection between the router and satellite is good.**

**Step 4: Place the satellite at the desired location**

- Press the Sync button on the back of the satellite, and within two minutes, press the Sync button on the back of the router.

**Step 5: Manage and monitor your Orbi Pro WiFi 6 network**

- To log in to the Orbi Pro WiFi 6 satellite portal and app, see the user manual, which you can download by visiting netgear.com/support.

**For more information on configuring your device through the router web interface, see the Orbi Pro WiFi 6 user manual.**

- For troubleshooting, see the Orbi Pro WiFi 6 user manual.
