1. Connect to power and Internet

Your Insight Managed Access Point, Insight router, Insight switch, and Insight modem use wired Ethernet connections to communicate. If you connect an Insight Access Point to a switch, make sure that the switch has Internet connectivity. Your Insight Managed devices also communicate with the Insight cloud over wired Ethernet connections.

1. Connect to power and Internet

To power up the WAX625, you can use a PoE+ switch or a power adapter. See the table below for requirements.

The Insight app and Insight Portal let you access your Insight network from anywhere on the network. You can configure and manage your Insight network from any device that can access the Internet. If you are using Insight Portal, you can access it by entering Insight Portal in your browser.

You can access Insight Portal by entering Insight Portal in your browser.

7. Configure the AP with the NETGEAR Insight Cloud Portal

To configure and manage the AP, you need to install the Insight app or Insight Portal on your computer. If you are using Insight Portal, you can access it by entering Insight Portal in your browser. If you are using Insight Portal, you can access it by entering Insight Portal in your browser.

The Insight app and Insight Portal let you access your Insight network from anywhere on the network. You can configure and manage your Insight network from any device that can access the Internet. If you are using Insight Portal, you can access it by entering Insight Portal in your browser.

The Insight app and Insight Portal let you access your Insight network from anywhere on the network. You can configure and manage your Insight network from any device that can access the Internet. If you are using Insight Portal, you can access it by entering Insight Portal in your browser.

You can access Insight Portal by entering Insight Portal in your browser.
C. Configure the AP as standalone in a web browser

1. Connect your computer to your AP's setup SSID (WiFi network name) using a WiFi-connection of your computer or mobile is terminated, reconnect to the AP using your new admin password.
2. Click the 1x2, 2x2, or 3x3 radio button.
3. Mark the wall where the mounting holes are.
4. Use the screws to attach the AP to the mounting plate.
5. Push the AP into the metal bracket.
6. Slide the T-bar partially into the metal bracket.
7. Hold the AP snugly and attach it to the mounting plate.
8. Pull the AP toward you to lock it in the mounting plate.

Mounting options

- The AP can be mounted on the T-bar or ceiling with a 15/16 in. (24 mm) flat-head screw, or you can use the 1/4-20 UNC and 10-32 UNC screws instead.
- The AP can be mounted on a wall using a flat-head screw, or you can use the 1/4-20 UNC and 10-32 UNC screws instead.
- The AP can be mounted on a wall using a flat-head screw, or you can use the 1/4-20 UNC and 10-32 UNC screws instead.

Mounting the AP on a wall

1. Connect the AP's AC power adapter to the wall outlet.
2. Place the mount outside on the surface to which it is mounted.
3. Use the screws to attach the AP to the wall.
4. Tap the AP and tuck it into the mounting plate.
5. Use the door latch to lock it onto the T-bar.

Mount the AP to a T-bar

1. Slide the T-bar partially into the metal bracket.
2. Attach the AP to the T-bar using your new admin password.
3. Slide the AP over the T-bar and attach it to the mounting plate.
4. Use the door latch to lock it into the mounting plate.

Mount the AP on a ceiling

1. Connect the AP's AC power adapter to the wall outlet.
2. Place the mount outside on the surface to which it is mounted.
3. Use the screws to attach the AP to the T-bar.
4. Slide the T-bar partially into the metal bracket.
5. Hold the AP snugly and attach it to the mounting plate.
6. Pull the AP toward you to lock it in the mounting plate.

Mounting the AP on a wall

1. Connect the AP's AC power adapter to the wall outlet.
2. Place the mount outside on the surface to which it is mounted.
