1. Connect to power and Internet

Power up the WAX630E access point (AP) by attaching a power adapter, or by connecting the AP to your network. The AP powers on and lights up with the appropriate power adapter (varies by region). The AP automatically detects and connects to the default Internet connection:

- **2.5 Gbps PoE**: The 2.5 Gbps speed on the AP is detected. It appears as a solid amber light. The LAN port LED lights up on the front of the AP.
- **5 Gbps PoE**: The 5 Gbps speed on the AP is detected. It appears as a solid green light. The LAN port LED lights up on the front of the AP.
- **2.4 GHz Wi-Fi**: The radio has at least one connected client. It appears as a solid blue light. The LAN port LED lights up on the front of the AP.
- **6 GHz Wi-Fi**: The radio is operating without clients. It appears as a solid green light. The LAN port LED lights up on the front of the AP.

**NOTE:** The Setup SSID is on the AP label and is shown in the format NetgearXX-1234. The default WiFi passphrase is 1234567890. For more information, visit the following pages:

2. Configure and manage the AP

Insight remote management offers additional features and costs. You can now add your WAX630E access point. It connects with Insight included. For more information, visit the following page:

Use the NETGEAR Insight Cloud Portal to configure the AP

- **NOTE:** In most situations, Insight detects the AP automatically, which can take several minutes. If the AP is not automatically detected, or you prefer to use another method to add the AP, you can add it using the Insight app.

B. Insight app/remote method

1. To add a new network location where you want to add the AP, or select a new location from the list of Insight-managed devices.
2. Enter the email address and password for your account and select OK to proceed.
3. If you are not automatically detected, or you prefer to use another method, you can add the AP using the Insight app.
4. If you do not have access to an Insight account, you can create an account or upgrade to an Insight Pro version.

A. Insight Cloud Portal

1. To add a new network location where you want to add the AP, or select a new location from the list of Insight-managed devices.
2. Enter the email address and password for your account and select OK to proceed.
3. If you are not automatically detected, or you prefer to use another method, you can add the AP using the Insight app.
4. If you do not have access to an Insight account, you can create an account or upgrade to an Insight Pro version.

C. Insight Cloud Portal

1. To add a new network location where you want to add the AP, or select a new location from the list of Insight-managed devices.
2. Enter the email address and password for your account and select OK to proceed.
3. If you are not automatically detected, or you prefer to use another method, you can add the AP using the Insight app.
4. If you do not have access to an Insight account, you can create an account or upgrade to an Insight Pro version.
We recommend that you register your AP with Netgear. When the login page displays, you can log in to the new SSID and WiFi passphrase that you set on the Day Zero Easy Setup page. A message displays to indicate that your settings are being applied.

Mounting options

You can mount an AP up to 10 ft (3.1 m) high, or you can mount the AP horizontally on a wall.

Mount the AP to a wall

1. Use the 3/16 in. (4.7 mm) drill bit, drill holes in the wall.
2. Use the screws to attach the mounting plate to the wall.
3. Mount the AP to a wall or to a ceiling with a 15/16 in. (24 mm) T-flange anchor.

Mounting options

1. Use the 3/16 in. (4.7 mm) drill bit, drill holes in the wall.
2. Use the screws to attach the mounting plate to the wall.
3. Mount the AP to a wall or to a ceiling with a 15/16 in. (24 mm) T-flange anchor.

Mount the AP to a T-bar

1. Use the thumb latch to lock the AP to the T-bar or the wall.
2. Follow the instructions on the Day Zero Setup page and your computer to connect the AP.
3. Place the AP on the T-bar and secure it with the locking latch.

Mounting options

1. Use the 3/16 in. (4.7 mm) drill bit, drill holes in the wall.
2. Use the screws to attach the mounting plate to the wall.
3. Mount the AP to a wall or to a ceiling with a 15/16 in. (24 mm) T-flange anchor.

Mount the AP on a wall

CAUTION: Make sure that the wall is not live before you begin the process.

1. Mount the mounting plate on the wall.
2. Connect any cables.
3. Place the AP on the mounting plate as shown.
4. Use the screws to attach the mounting plate to the wall.
5. Lift top and slide into the wall until attached.
6. Connect the AP to a router or switch.
7. Power on the AP.
8. Connect the AP to your network.

Mount the AP on a wall

1. Mount the mounting plate on the wall.
2. Connect any cables.
3. Place the AP on the mounting plate as shown.
4. Use the screws to attach the mounting plate to the wall.
5. Lift top and slide into the wall until attached.
6. Connect the AP to a router or switch.
7. Power on the AP.
8. Connect the AP to your network.
