Enjoy fast, expansive WiFi with Nighthawk Mesh WiFi 6 System

Introducing WiFi 6—the latest generation of WiFi that delivers four times better performance than AC WiFi. With innovative technologies, WiFi 6 delivers a huge boost in speed and total capacity. Rising to the challenges of modern smart home demands, this new standard of WiFi is ready to support more devices with better reliability and faster speeds. WiFi 6 is backward compatible with 802.11 ac/n/a/g/b.

Latest WiFi Technology

Upgraded WiFi that's up to 4X the performance and capacity of 11ac[†]. 100% backward compatible.

Whole Home Coverage

Eliminate WiFi dead zones by simply placing satellites throughout your home to form a smart and reliable WiFi network.

Super-fast WiFi

Combined WiFi speeds over 1.8Gbps keep up with your family's streaming, gaming and smart home needs.

Compact Design

Sleek compact design makes it easy to place almost anywhere to enjoy stronger WiFi everywhere.

Expandable

Add satellites to expand your coverage even further. This mesh WiFi system supports Wi-Fi CERTIFIED EasyMesh™.

Orthogonal Frequency Division Multiple Access (OFDMA)

Using the OFDMA¹ feature of WiFi 6, the WiFi traffic is managed much more efficiently since data is transmitted from different devices concurrently, rather than having each device's data wait for its turn. This results in an efficient use of air-time, reduced latency, and increased bandwidth to add more devices to your network.

Ultra-powerful AX-optimized Quad-core Processor

The Nighthawk WiFi 6 Mesh System is powered by a 1.5GHz quad-core processor, is built for performance at an ultimate level. The ultra-fast processor enables the router to seamlessly handle data intensive applications such as 4K UHD video streaming, VR/AR gaming, as well as provide a stronger, more reliable WiFi experience. This powerful processor is optimized for AX making intelligent spontaneous decisions to schedule data traffic to maximize WiFi Bandwidth utilization.
