

NETGEAR 108 Mbps Wireless PC Card WG511T

These setup instructions assume that you will connect to an access point or wireless router.

Estimated Completion: 10 minutes.

Installation

1. First, install the WG511T software.

Insert the NETGEAR CD. If the CD main page does not appear, double click **Autorun.exe** on the CD.

- Click **Install the Software**. The Check for Updates window opens.
- If you are connected to the Internet, click **Check for Updates**. If not, you can choose to install from the CD.
- When the Installation Complete message appears, click **Next**.

2. Now, insert the wireless PC card.

You will be prompted to choose the country you are located in. Select your location from the list.

3. Use the Smart Wizard to set up your wireless PC card.

- Windows 2000 users go to Step b. Windows XP or Vista users can set up the wireless adapter either with the NETGEAR Smart Wizard (recommended) or the Windows configuration utility.

- NETGEAR Smart Wizard:** Reveals more information about each network and makes it easier to troubleshoot network connection problems.

- Windows Configuration Utility:** See the Windows documentation or “Using Windows XP and Vista Wireless Configuration Utilities” at: <http://documentation.netgear.com/reference/enu/winzerocfg/index.htm>

- Click **Next** to accept the NETGEAR Smart Wizard.

You will be prompted to let the Connection Wizard guide you (recommended).

- Click **Finish** to accept.

4. Connect to a wireless network.

- Select the wireless network from the drop-down list, and the wizard records your choice.
- Hidden networks do not broadcast the Network Name (SSID). These networks are in the drop-down list, but the Network Name (SSID) is blank.
- If the network uses security, then the Smart Wizard detects it.
- Follow the Wizard steps for Security (if used) and for saving a Profile.
- After you have reviewed the settings, click **Finish**.

The Connection Wizard initiates your wireless connection. It could take up to a minute for your wireless connection to be established.

Verifying Wireless Connectivity with the Status Bar

- The connection status indicator and the WG511T icon show the status of the connection.
- For details about the icons in the status bar, the WG511T LEDs, and troubleshooting tips, see the *NETGEAR 108 Mbps Wireless PC Card WG511T User Manual* on the NETGEAR CD.
- The Internet/Router connection indicator shows the progress of your connection.

Connection Indicator	Description
Connected to Internet	Wireless Internet connection OK.
Connected to Router	Wireless connection to router OK but no Internet connection at router.
_____ or 169.254..x.x	Wireless connection to a router OK but problem with the router. See the online help or <i>User Manual</i> for troubleshooting tips.

Technical Support

Thank you for selecting NETGEAR products.

After completing the Smart Wizard configuration assistant, locate the serial number on the bottom label of your product, and use it to register your product at <http://www.NETGEAR.com/register>.

Registration on the Web site or over the phone is required before you can use our telephone support service. The phone numbers for worldwide regional customer support centers are on the Warranty and Support Information card that came with your product.

Go to <http://kbserver.netgear.com> for product updates and Web support.
